The primary purpose of the Rescue Volunteers is to help the kids out of the water should any require assistance. Please note that the RV should make certain not to get between the Timers and the water during the beginning or end of a race (the Timers have to be able to see when the swimmer touches the wall). **However, please note that during the AM SESSION RV's are positioned along the moveable bulk heads for relays; they also may be assisted by Marshals on the bulkhead. RVs should attend the Marshals' briefing.**
